To: Advisory Council
Puget Sound Clean Air Agency
Subject: Update – DERA Cargo Handling Grant

Honorable Members:

Staff has been administering an \$850,000 EPA-funded grant to reduce emissions from cargo-handling equipment at the ports of Seattle and Tacoma by replacing old equipment with newer cleaner equipment and by retrofitting other existing equipment. At your February meeting, Beth Carper will provide an update on what has been accomplished through the grant and the lessons learned regarding how to make retrofits on off-road equipment more successful.

Respectfully submitted,

Craig T. Kenworthy
Executive Director
